CANADA'S PET INSURANCE

In August 2020, the Canadian Dog Show World lost a colourful and wonderful Handler. Larry, a true sportsman, was always willing to help anyone or give a mini handling lesson on the fly.

Larry could be picked out of the crowd in an instant; he was famous for extraverted suits, colourful ties, and his contagious laugh. Dogs loved him, maybe something to do with his famous “crack bait” treats, always available in a pocket and generously shared.

Larry was a friend of, and volunteer for the Alberta Kennel Club...the RV parking experience will never be quite the same. We invite you to emulate Larry's zest for the Show and look in your closet to see if there is something there that would be Larry approved. If not, get shopping so you can be Like Larry on Saturday. Smile Like Larry and have a great show and help us celebrate his memory.

Eleonore and Frank Rebischke "IrishWarlord" January 2023

In January 2023, the purebred dog show world lost a great ambassador to the Irish Setter Breed and a great sportsman for her newly found love of the Sussex. In her later years when her knees were giving the hint of decline; and she felt she could no longer keep up with her beautiful big red dogs she decided to get a walking breed. Eleonore moved forward with another red breed "of course" to keep her in the sport of Purebred dogs. She moved forward with the Sussex. I miss my dear friend Eleonore Rebischke January 6, 2023

If you can only listen to one song please listen to "If You Could Read My Mind" by Gordon Lightfoot which was one of her favorites to celebrate her life and IrishWarlord Kennels. Thank you, Eleonore for being that friend.

*Jacqueline Fussel

Eleonore was a long time member of the Alberta Kennel Club and held the President's position in 1985-1986. She was always a supporter of the Club; we mourn her passing and remember her zest for life and her love for her red dogs.

** ATTENTION CONFORMATION AND RALLY-OBEDIENCE EXHIBITORS **

Due to Judging overloads, some of the breed judging has been modified. The Group assignments remain the same as posted in the premium list. **Please check the Judging Assignments following below, all changes after close of entries are in RED.**

Unfortunately Suzanne Hemminger is no longer able to come and judge, Lisbeth Booth has kindly agreed to take on all of her assignments. **Please check the Judging Assignments following below, all changes after close of entries are in RED.**

The following CKC rules apply for the replacement judge and for the overload:

A new entry, along with accompanying fees, will be accepted by the Show Secretary up to one (1) hour prior to the START OF THE SHOW."

CKC RULE 3.5.1 When entries close, and the club determines that the total number of dogs entered under a judge exceeds 175 at breed level, the club in question must seek approval from the CKC to transfer a sufficient number of dogs to another judge to reduce the total number to 175. One or more regular classes shall be reassigned until the original assignment is brought as closely as possible to 175 dogs. Exhibitors affected by the change may withdraw their entries up to one (1) hour before judging of the breed, providing that notice of withdrawal is made in writing. All entry and listing fees for withdrawn dogs shall be refunded. Similarly, a dog entered at the show but not under the judge drawing an overload, may enter under the substitute judge as provided for in Section 8.5.

SPACE IS LIMITED, LAST CLINIC FILLED QUICKLY, DON'T MISS OUT!

The Examination

1. A short health survey regarding the dog's breathing history.
2. A brief physical exam while the dog is calm including auscultation where the assessor listens to the dog's breathing with a stethoscope gently positioned on the side of the neck. This establishes a baseline for any clinical signs of BOAS.
3. A short exercise testing consisting of a brisk three-minute walk. This is designed to expose clinical signs of the disease in an otherwise calm and asymptomatic dog. It is not designed to assess cardiovascular fitness.
4. A post exercise auscultation after increased airway activity to compare to the pre-exercise baseline.

RFG Scheme Screening

The noise the trained veterinarians are listening for during auscultation include:

- **Stertor** - a low pitched vibrational noise heard above the level of the larynx
- **Stridor** - higher pitched 'sawing' noise heard over the larynx
- **Nasal sterter** - low pitched nasal snort/vibration
- **Nasal stridor** - high pitched nasal whistle, usually on breathing in

RFG Scheme - What Does the Grading Mean?

The Respiratory Function Grading Scheme (RFGS) utilizes a sliding scale of 0 to 3 to objectively diagnosis BOAS:

- **Grade 0** - the dog is clinically unaffected and free of respiratory signs of BOAS (no evidence of disease, no BOAS related noise heard even with a stethoscope)
- **Grade 1** - the dog is clinically unaffected but have mild respiratory signs linked to BOAS (noise is mild and only audible with a stethoscope)
- **Grade 2** - the dog is clinically affected and has moderate respiratory signs of BOAS (noise is audible even without a stethoscope)
- **Grade 3** - the dog is clinically affected and has severe respiratory signs of BOAS (noise is audible even without a stethoscope)

Publication of Results

Grade 0 and Grade 1 - are considered clinically normal and BOAS unaffected as they exercise without difficulty and do not appear to have any clinical signs related to airway obstruction.

Clinically normal dogs (**Grade 0 and 1**) will receive OFA certificate numbers, and their results will be posted on the OFA website.

Grade 2 and Grade 3 - when stertor or stridor noise is heard without a stethoscope, whether intermittent or continuous, these dogs are considered affected with clinical signs affecting their quality or life.

Grade 2 or 3 results will only be posted on the OFA website if their owners authorize release of abnormal data.

BOAS Breeding Recommendations

Using the RFG Scheme grades are the guidelines in the chart, concerned responsible breeders can apply the selective genetic pressure to reduce the chances of producing puppies affected by BOAS.

However, since the inheritance of BOAS is not fully understood and is not entirely predictable, this guideline cannot guarantee that all puppies from unaffected parents will be free of BOAS.

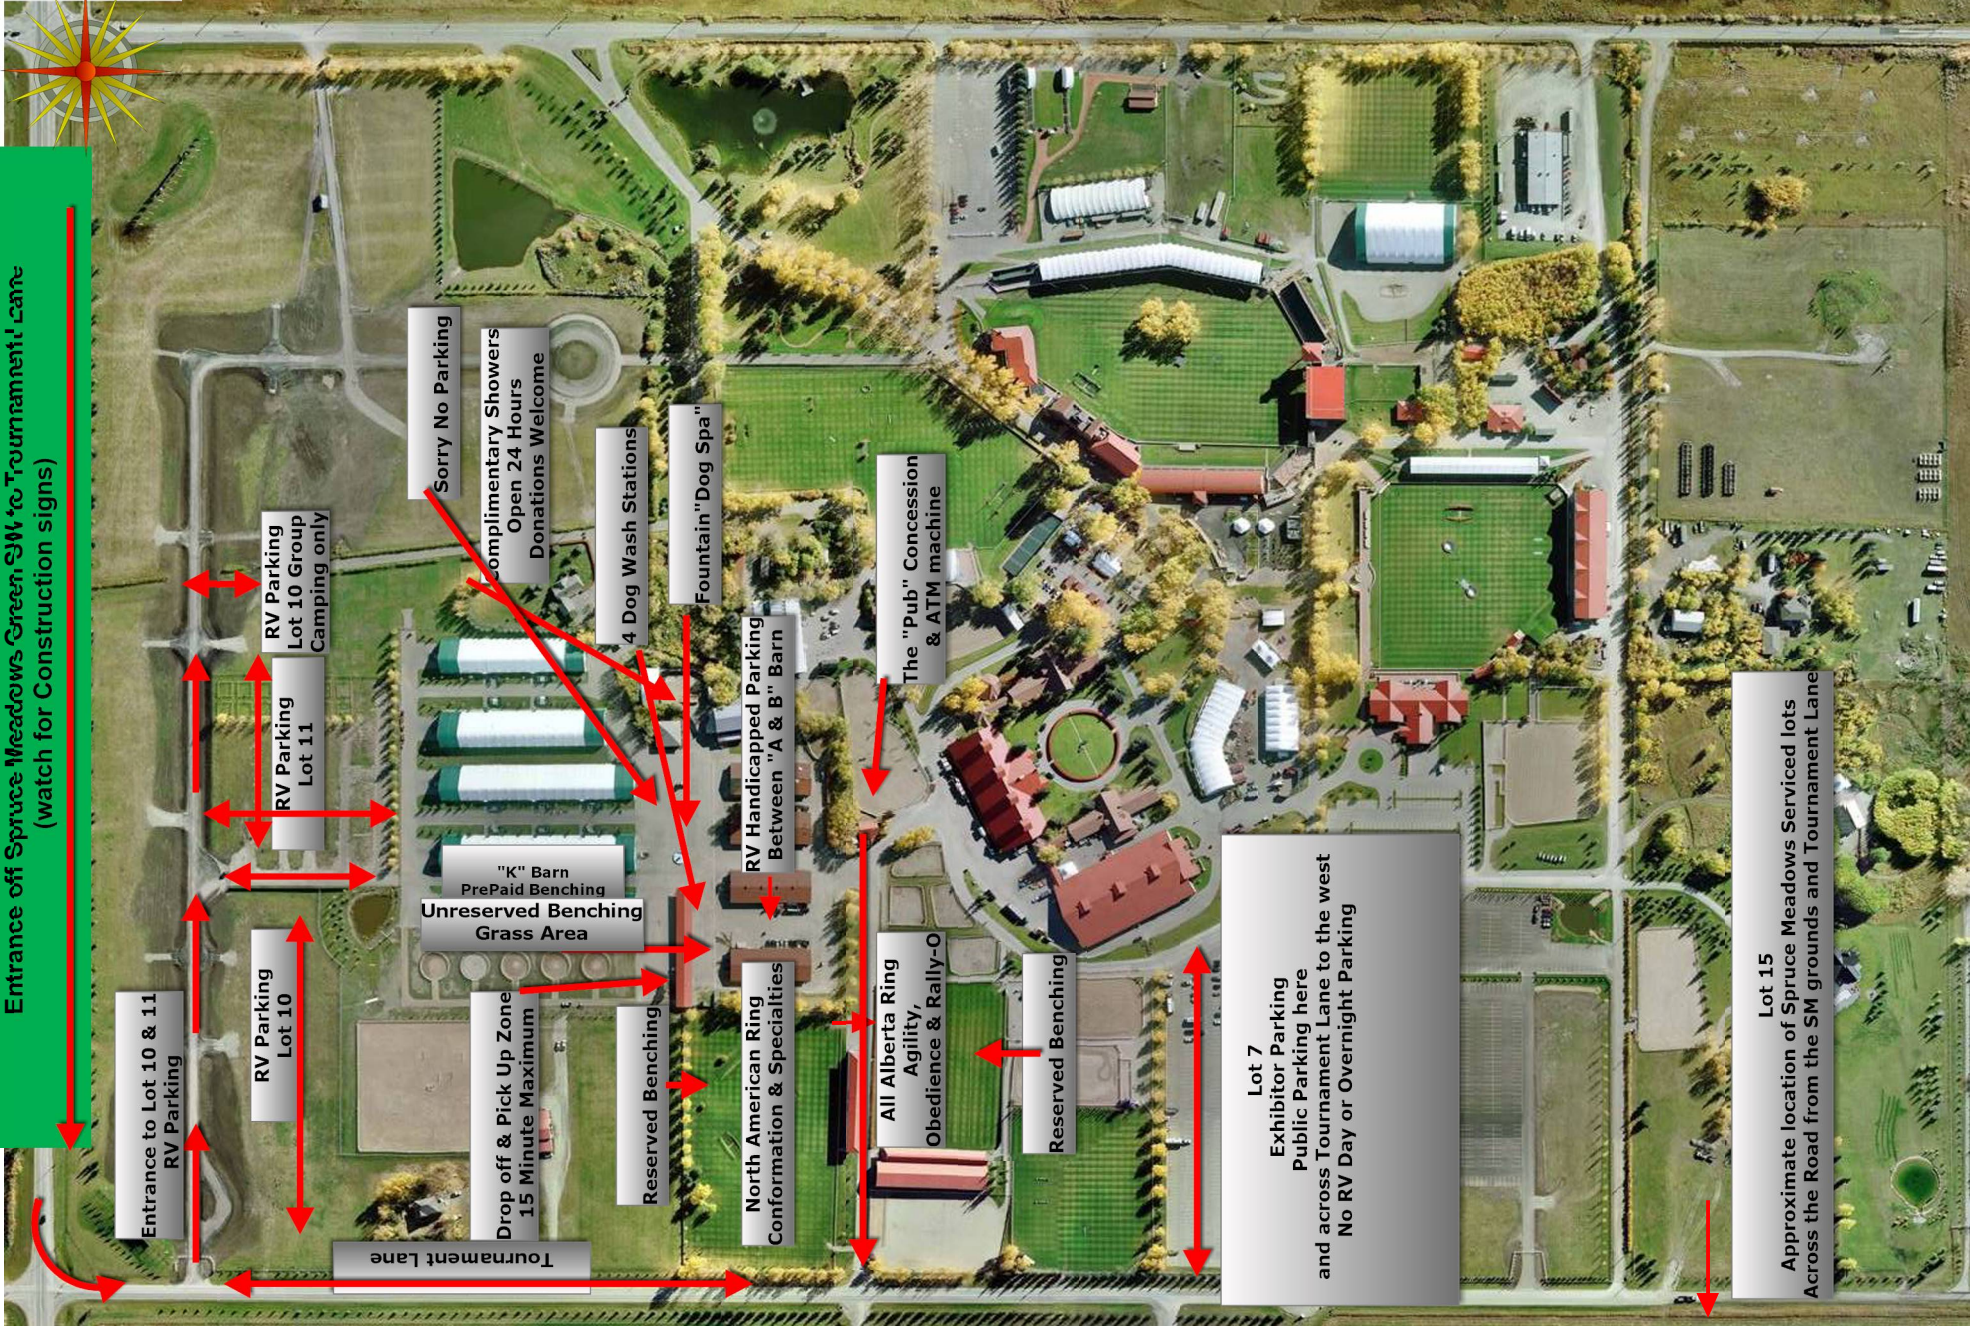

Ultimately, responsible breeders use the RFG Scheme to screen their breeding stock and include the results in their selection criteria.

		DOG ONE (sire or dam)			
DOG TWO (sire or dam)	RFG Grade for each dog	Grade 0	Grade 1	Grade 2	Grade 3
	Grade 0	Green	Green	Green	Red
	Grade 1	Green	Green	Green	Red
	Grade 2	Green	Green	Yellow	Red
	Grade 3	Red	Red	Red	Red

- Green** - These mating combinations have the lowest risk of producing puppies effected by BOAS
- Yellow** - A Grade 2 or 3 mating will increase th risk of producing puppies affected by BOAS
- Red** - These mating combinations have a high risk of producing puppies affected by BOAS and are not recommended
