

CADF Ophthalmology Schedule

Please start your exams on ofa.org – Without an exam in the clinic on OFA we will be unable to complete your CAER exams.

You need to arrive at least 20 minutes prior to your appointment time for the dilation drops to be placed and have time to take effect; this allows our veterinarian to continue running on time. If you are registered for Glaucoma or have a breed where pre-screening is necessary, you will see the Doctor prior to the eye drops, and again once dilated.

We ask that there are no questions during the examinations as these are screening exams and not consultations with the veterinarian. For all questions please reach out to their facilities to book a consultation.

For any questions or concerns, please contact Kimmi.
